

### 3D Shapes – Instructions to Make Your Own Box

1. Print this page out on your printer
2. Carefully cut out along the edges of the shape
3. Fold along ALL the dashed lines
4. Put non-runny glue (like 'Pritt') on the tabs indicated
5. Fold into a box and glue together. For the final side, carefully pinch the glued edges together.

### How about making more boxes ?

Create your own dice or draw your own design !
