

3D Shapes – Instructions to Make Your Own Pyramid

1. Print this page out on your printer
2. Carefully cut out along the edges of the shape
3. Fold along ALL the dashed lines
4. Put non-runny glue (like 'Pritt') on the tabs indicated with "G"
5. Fold into a box and glue together. For the final side, carefully pinch the glued edges together.

How about trying to create your own shape by gluing lots of cubes and pyramids together ?
